

# Molecatchers PA Spec

## Notes:

The band will bring everything that is not shown in red in the diagram. In addition, shown in red, we need one DI box, one microphone with stand for the caller, one microphone without stand for the electric guitar and at least two stage monitors with separate mixes.

A 240V mains supply is needed for the guitar amp.

**EQ notes:** accordion left hand (bass) and stomp board need heavy treble cut. Stomp board should be all bass, so may need mid cut too. Mandolin may need slightly less heavy treble cut.
